Zero-turn swimming

Infinite swimming pleasure for young and old

Control via sensor button

The power can be set to 5 levels via the Ospa sensor button. 6 training programmes can be created in conjunction with Ospa BlueControl® Web.

Illuminated jets

A unique style element is the optional RGB lighting of the nozzles. They light up in a colour that corresponds to the power level. This makes the power level recognisable while swimming.

For the whole family

As a compact counter-current system, Ospa TopSwim 3 ticks all the boxes whether you are looking for a sporting challenge, relaxed swimming or family fun.

All-in-one

3 jets, hair-safe intake and sensor button in an elegant housing with polished stainless steel panel. Quick and easy installation. Suitable for all pool types.

Customised step training

In conjunction with Ospa BlueControl® Web you can store 6 personalised training sequences, each with 5 progressive performance levels. The intensity and duration can be customised.

Laura Philipp

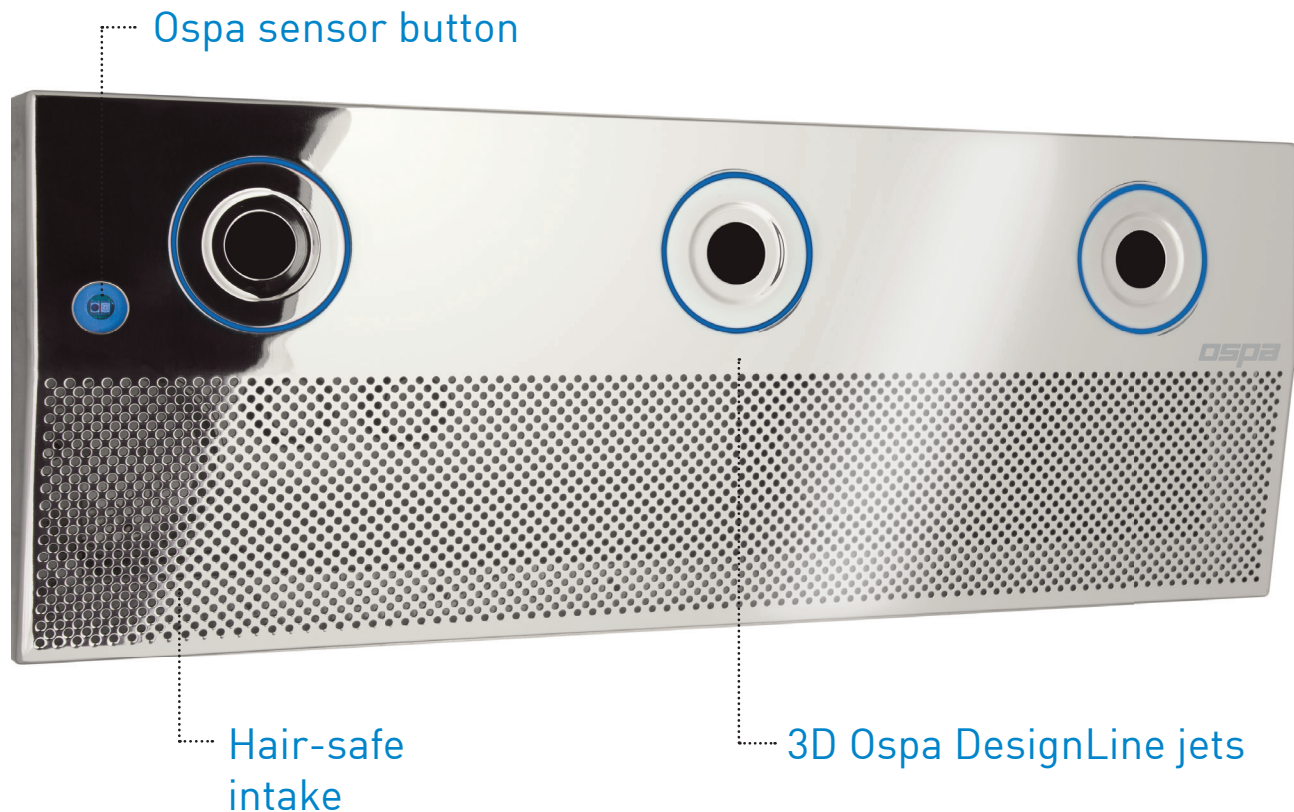

IRONMAN World championship Hawaii 2023 3rd place, 2022 4th place, IRONMAN European Champion 2021 & 2022, 5x IRONMAN winner, 18x IRONMAN 70.3 winner, fastest German Ironman athlete (world record in 8:18:20 hours) via Ospa-TopSwim 3:

"During my first test swim, I was surprised by the uniform and wide current of the Ospa TopSwim 3. It feels like real long-distance training. Different training levels enable effective swimming training."

Ospa TopSwim 3

The upgrade for any pool

The compact counter-current system transforms your swimming pool into an endless pool. The horizontal arrangement of 3 Ospa DesignLine jets creates a wide swimming area for a maximum natural swimming feel.

Flow-optimised jets ensure a uniformly strong current.

With its 5 power levels, the Ospa TopSwim 3 can be set to offer relaxed, natural swimming and fun for the whole family.
