

Treatment products and pro photoanalyzer

The original treatment for your pool

- Original Ospa quality
- For soft swimming pool water
- High coverage
- Value preserving

ospa

Treatment products for optimum water quality

The enjoyment of swimming in a pool is heavily dependent on the water quality. Only crystal clear and inviting water can provide pure swimming delight. Enjoy fitness in revitalising, clear water and allround wellness: Ospa's water treatment solutions guarantee hygienically clean, refreshing water for swimming every time. Avoid eye redness and skin irritation. Ospa treatment products are synonymous with excellent quality and efficacy. Their control and dosing systems are calibrated and adjusted to the concentration of active ingredients in Ospa water treatment solutions. As a result, we strongly recommend that you only use genuine Ospa water treatment solutions.

Benefits

- Perfectly tailored to Ospa's treatment systems
- Safe disinfection and a consistent pH value
- Clear, germ and algae-free swimming water

+	 Safe handling
	 Highly cost-effective
	 Ospa FreshPlus DIN 19 643 approved for public and private use.

Ospa Hypochlorite CA

Fully soluble, highly effective inorganic chlorine granules with a high active chlorine concentration for disinfection and algae control in swimming pools. Contains no algaecides.

3 kg pack (C, O, N)

Ospa pH minus

The correct pH value is critical in water treatment. Ospa pH minus is a powdered, easily soluble product for decreasing and stabilising pH levels.

6 kg and 18 kg pack (Xi)

Ospa KH and pH plus

The ideal pH value for optimal water treatment. Ospa KH and pH plus is a powdered, easily soluble product that increases carbonate hardness (acid capacity) and pH.

6.5 kg and 18 kg pack

Ospa Flocculation Agent 1 and 2.5

Simple application and rapid flocculation. Continuous dosing with the Ospa dosing system. Especially for filter capacities up to 10 m³/h.

25-litre canisters

Ospa H2 Stop Winterizer

For filled outdoor pools. By adding it after the bathing season, less lime precipitates, dirt deposits do not adhere as firmly and strong algae growth is suppressed.

3-litre canister (for approx. 100 m³ pool content), (Xn)

Ospa Rein-Extra

Liquid cleaning agent for general cleaning and the pool edge when the pool is filled. Safe for use on stainless steel, tile, grout, and concrete and removes lime, manganese, and iron deposits. Biodegradable.

5-Litre canister (Xi)

Ospa Base-Extra

Low-foaming alkaline cleaner to remove grease and other organic soiling.

2.5-Litre canister (Xi)

Ospa dosing systems

We recommend our proven Ospa dosing systems for the automated dosing of water treatment products.

Pro photoanalyzer

For the accurate calculation of water values

Exact compliance with water values is critical for a pleasant and hygienic swimming experience. Professionals use the microprocessor-controlled Ospa photoanalyzer to check water values. The device itself and all the necessary measurement equipment are neatly organised inside a hard case.

Ospa photoanalyzer DPD-pH-KH-GH

Microprocessor-controlled analyser for photo-analytical measurement of chlorine content and pH value. With measuring equipment for determining acid capacity and overall hardness. (C, Xn)

Case size: 440 x 340 x 95 mm

Simple operation

Neatly organised complete kit

C = Corrosive | O = Oxidizing | Xn = Harmful | Xi = Irritant | N = Dangerous for the environment
