# Train like the pros

Effective, peak level long course training

## Laura Philipp,

4th place Ironman Hawaii and German 70.3 Triathlon Champion on Ospa PowerSwim:

"During my first test swim, I was surprised by the even and powerful current of the Ospa PowerSwim. It felt like real long-distance training. A variety of training programs enable an effective workout and interval training. We experimented with different numbers and positions of jets. The diversity of Ospa PowerSwim's options is fascinating."

## Customized training levels

In connection with Ospa BlueControl®, the entire Ospa PowerSwim family makes it possible for you to create your own customized training plan: Save up to 6 personalized training programs, each with 5 successive power stages of customizable strength and duration.

# The versatile

unlimited swimming experience

## PowerSwim 2

The athletic challenge for anyone who wants to train, keep fit or just stay healthy. The uniform current of the PowerSwim 2 produces a natural swimming feel that sets it apart from

other systems. Using the adjustable ball jets, the current can be optimally customized.

Regular training enlarges heart volume, reduces heart rate and causes the heart to work more efficiently. In addition, the water pressure makes inhaling more difficult, which trains the respiratory musculature, not to mention the beneficial massage effect attributed to the water.

## There's no substitute for power

The powerful PowerSwim 2 counter-current swimming system transforms the pool into an endless swimming channel. In the ideal swimming range, the current impulse equals many times that of conventional counter-current systems. Even the most ambitious athletes will get their money's worth.

## For athletes, beginners and the entire family

The power of the counter-current system is individually controllable. In addition to the athletic challenge, there is no shortage of relaxed swimming and family fun.

# Ospa PowerSwim 2

The customized counter-current system

PowerSwim 2

The powerful PowerSwim 2 transforms your swimming pool into a swimming channel that is as wide as it is powerful. The continuously variable Ospa-PowerSwim 2 provides for relaxed and natural swimming for the entire family, as well as powerful counter-current swimming for ambitious swimmers.
